

Carports & pavilions

A roofed open parking space for the car -- a custom carport made out of wood is a visual and inexpensive alternative to a prefabricated garage. Whether it is built as an extension of an existing building or as a freestanding unit, our carports are characterized by stable and weather resistant construction. The design variants range from flat roofed to peaked roof; from open to side paneled models. This keeps your car well protected from wind and weather, while ensuring constant air circulation.

*Custom planning.
Basic dimensions of the
carport to your specifications.*

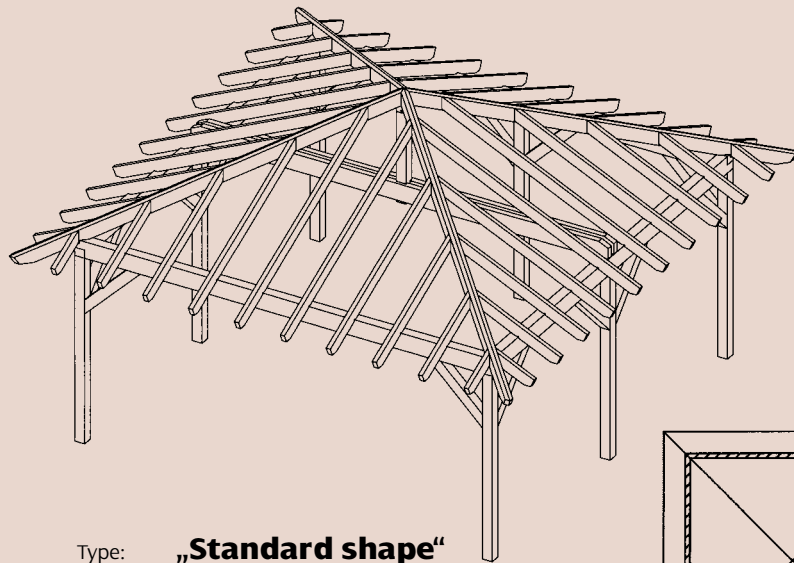

Ridge cap made of galvanized steel

A pavilion will give your garden a new centerpiece. While other forms of outbuildings often serve a practical use, the pavilion originated as an innovation of the gardener's art - it is a romantic place to lounge on a cozy summer evening.

If you prefer a closed variant, the open sides can be closed off with perfectly fitted wall, balustrade, and bench elements.

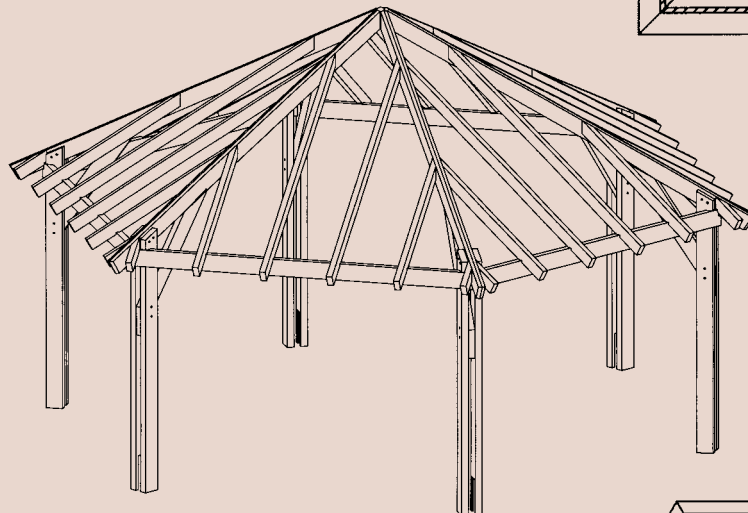

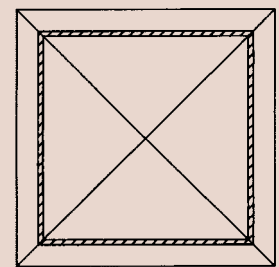

The detail work reveals our fine craftsmanship.

Type: **„Standard shape“**

Wood: **Douglas fir, pressure-treated or natural**

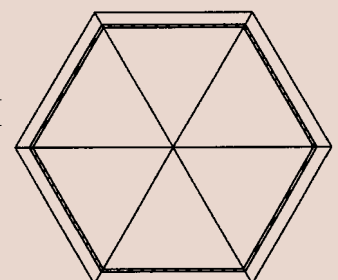

3.00 x 3.00 m, 4.00 x 4.00 m, 5.00 x 5.00 m

Type: **„Hexagon“**

Wood: **Douglas fir, pressure-treated or natural**

Ø 5.00 m, 6.00 m, 7.00 m

We build each carport/pavilion individually; special sizes or designs are no problem.
